

LCG[®] On/Off Controller Wiring

TN 09-10: Basic Wall Switch Wiring Diagram

Please note: You can connect the switch either to Line and DT On-Off on the left side of the controller

OR

To DT On-Off and Common on the right side of the controller for a dry contact switch

Never connect high voltage (110/220VAC) to the dry contact interface, as this will cause irreversible damage to the controller.

FLEX ON/OFF ONLY
PRODUCT# GAU3-S-O-1

7-pin and 2-pin connector specification. (included with controller)
MSTB 2.5 HC/2-STF-5.08 2pin manufacturer: Phoenix contact
MSTB 2.5 HC/7-STF-5.08 7pin manufacturer: Phoenix contact

For "SmartHome" programming and operation features please contact the factory for additional wiring details.

Gauzy does not guarantee products which are not wired according to these guidelines.
